

Nordic Backup Pro Plans

Universal storage for your most sensitive, important data.
Backup your business now, starting at \$10/month.

Backup your data now, before you're lost without it.

Software & Setup

Nordic Backup Pro is your universal backup solution. Compatible on any type of computer, our software can securely backup data of any kind. Select the databases, files, servers, and network folders you want to backup, and Nordic Backup Pro will automatically save any changes made to them. Even if your computer crashes, you can manage and restore all of your data, right from our website, with just a few clicks.

Cloud Storage

Our No Limits Cloud™ storage gives you unlimited storage for all of your files, across an unlimited number of devices. When you install Nordic Backup Pro, all of the files, servers and databases you select are automatically backed up, so you never have to worry if your data is safe. Restore previous file versions, and even recover a copy of your server from the cloud if disaster ever strikes. That's total peace of mind.

Security

Your files are made private before they're ever saved to the cloud. Before your files and backup data are transmitted from your computer, they're encrypted with an unbreakable 256-bit AES encryption, using a private password that only you know. With multiple, world-class data centers and redundant servers, you can rest assured that your personal data is always secure.
