

## Nordic Backup Small Business Plans

Secure storage for your most sensitive, important data. Backup your business now, starting at \$249/year.

# Backup your data now, before you're lost without it.

### Software & Setup

Use our simple backup wizard to select the files and folders you want, on whatever schedule you want, on as many computers as you want, and our software will automatically and continuously save any changes made to them. Database and bare metal image backup are also available so you can protect any type of data locally and in our cloud. No matter what happens, recovering your data to any computer is easy.

### Cloud Storage

Nordic Backup Small Business plans allow an unlimited number of computers, servers, and NAS devices to share a pool of our cloud storage with no limit to the number of previous file versions or local backups you may want to keep. With payments made annually, our Small Business plans are the simplest and most affordable backup for business you'll find anywhere.

### Security

Your files are made private before they're ever uploaded to Nordic Backup. As each file is transmitted from your computer, it's encrypted with unbreakable 256-bit AES encryption using a private password that only you know. With multiple, world-class data centers and redundant servers, you can rest assured that your personal data is always available and completely secure.
